

Freestyle & TaxJar

Managing sales tax collection and reporting has never been more complex for eCommerce companies.

Why is it so challenging?

- ▶ Existing laws continue to change
- ▶ More states are choosing to enact their own regulations
- ▶ Different laws in each state place a burden on business owners with little benefit except the avoidance of penalties

Now, M.O.M. users can navigate changes and comply with difficult challenges such as being able to:

- ▶ Understand and comply with tax nexus rules in each state
- ▶ Access live sales tax calculation down to the zip plus four level
- ▶ Charge and collect sales tax at the right rate in each state
- ▶ Avoid audits and penalties associated with improper collection and remittance of taxes
- ▶ Automatically review, report and remit taxes to every state where you have a tax nexus
- ▶ Save time while remaining in compliance

How?

Freestyle Software has partnered with TaxJar, a leader in sales tax collection and reporting for eCommerce companies to help you to do all this and much more.

M.O.M. TaxJar Module's certified integration:

- ▶ Uses TaxJar's API to connect directly with M.O.M.
