

## Introducing Freestyle's Direct Integration to Salesforce Commerce Cloud

Freestyle's Direct Integration to Salesforce Commerce Cloud provides merchants with an efficient way to manage orders, fulfillment, product/ inventory synchronization and more with ease, **within** the M.O.M. application.

Direct Integration to Salesforce Commerce Cloud will streamline the process of passing data between M.O.M. and salesforce Commerce Cloud, saving time and reducing manual entry of information. This allows eCommerce merchants to enjoy a powerful integration between **Salesforce Commerce Cloud and M.O.M.**

### Freestyle Salesforce Commerce Cloud Direct Integration:

- **Download Orders**
  - Download orders directly within M.O.M.
  - Authorize in Salesforce Commerce Cloud and capture in M.O.M.
  - Refund transactions directly in M.O.M.
  - Tokenization support
  - Leverages latest API from Salesforce Commerce Cloud
- **Order Acknowledgement**
  - Update status in Salesforce Commerce Cloud once downloaded in to M.O.M.
  - Improved download performance
  - Visibility of order status in Commerce Cloud
- **Synchronized Shipments**
  - Creates shipment record in Salesforce Commerce Cloud
  - Shipment record will include shipping service level and tracking number
- **Publish/Update Product Information**
  - Supports product attributes (parent/child or size/color)
  - Product store visibility
  - Title, description, weights, dimensions, product type, different pricing types and more
- **Synchronized Inventory**
  - Keep M.O.M. inventory levels accurately reflected in Salesforce Commerce Cloud
- **Connect One or Multiple Commerce Cloud stores to M.O.M.**
  - Supports multiple Salesforce Commerce Cloud stores
