

# SHIPPO INTERNATIONAL MODULE

*Streamlining international shipping with M.O.M.*

*Shippo International Module (SIM) provides merchants with a streamlined workflow to ship orders internationally. SIM allows merchants to conveniently complete item and customs declarations within M.O.M., along with an efficient workflow to print customs declarations, commercial invoices and shipping labels.*

## The Challenge – Shipping International Orders

*Today in M.O.M., users have a segmented process of fulfilling international orders:*

- Order imported or manually entered in M.O.M.
- Exporting shipping information to shipping application
- Completing item and customs declaration forms outside of M.O.M.
- Printing custom declarations, commercial invoices and shipping labels outside of M.O.M.
- Matching international paperwork from outside of M.O.M. with M.O.M. orders.
- Importing shipping information in M.O.M. tracking information and shipping service
- Reviewing / reconciling accuracy of shipping Information.
- Managing 3<sup>rd</sup> party shipping applications
